

Trimble's GET CURRENT EVENT Starts Now!

Dear [FirstName] ,

Trimble Protected has just announced a "Get Current" promotion for Trimble Business Center. During this promotional period, customers who have lapsed by more than 90 days will have the opportunity to get back into coverage with no reinstatement charge — they'll pay the in-coverage price to reinstate their license.*

This offer is valid until August 31, 2020.

What Products Are Eligible Under This Promotion?

- Trimble Business Center Field Data
- Trimble Business Center Surface Modeling
- Trimble Business Center Survey Intermediate
- Trimble Business Center Survey Advanced
- Trimble Business Center Site Modeling
- Trimble Business Center Site Construction
- Trimble Business Center Infrastructure Construction

** Volume Discounts do not apply to this promotion. Only one year of coverage may be purchased under this promotion.*

Trimble Business Center modules are not part of this promotion. A Trimble Business Center module does not have its own factory warranty or protection plan end date. The end date of the module is linked to the underlying Business Center edition.

The Trimble Business Center edition must be under a current factory warranty or protection plan in order to add a module.

Why Get Current?

Customers who reinstate their license, and are on v5.21, will now have access to [Trimble WorksManager](#). In addition, they will have access to the New Trimble Business Center Training Video Library.

This is a new resource that has just been made available by Trimble, access to the library is free — there are no subscription fees or charges. There are currently over 25 hours of hands-on instruction in this bundle and there are more to come. The video below will explain more...

We hope you'll take advantage of this amazing resource! And if you have any questions please don't hesitate to contact us.

Regards,
